

Dancing Popcorn

One of our most popular YouTube videos is 11-year-old Lyla's Popcorn Firing Doorbell, and in this activity you can have a go at making your own invention that makes popcorn dance!

What you Need:

- 1 cup dried popcorn kernels
- 1/4 cup bicarbonate of soda
- White vinegar
- See-through glass jar

This could get messy, so wear old clothes and do the fun, fizzy part over the sink!

Steps:

1. Pour 1 cup of dried corn kernels into the jar.

Scan to see our
Popcorn Doorbell!

2. Fill the jar about $\frac{2}{3}$ full with white vinegar.

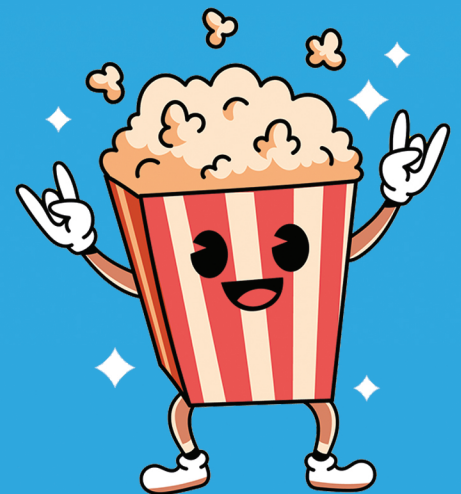

3. (Messy part!) Slowly pour in the baking soda and watch the popcorn start to boogie!

4. Popcorn Party Time!

We hope you enjoy making your popcorn kernels dance as much as we did!
